# Ethan Wang

---

## OBJECTIVE

To obtain a new graduate entry level software engineering position to continue to advance my software development skills and expand my knowledge of industry.

## EXPERIENCE

### **Salesforce, San Francisco** — *Intern, Performance Engineering*

June 2019 - September 2019

- Investigated database performance between MySQL on AWS EC2, RDS, and Aurora to determine an appropriate location for production data store
  - Leveraged sysbench and custom Lua scripts to match production data shape and traffic model
  - Created Bash and Python scripts to ease automation and data aggregation, using the Google Sheets API
  - Presented results and key takeaways to product managers and executives

### **Salesforce, San Francisco** — *Intern, Performance Engineering*

June 2018 - December 2018

- Developed an automated framework to run backend load tests against standalone AWS instances of the Salesforce core application
  - Utilized Taurus, JMeter, and InfluxDB to run and store tests
  - Wrote Bash scripts and a Java Spring Boot application to automate setup and upload test results
  - Created custom Apex controllers to expose an API to parse and store data in Salesforce

### **Xueban Software, Shanghai** — *Intern, Software Engineering*

June 2016 - September 2016

- Developed a question and answer web application on WeChat
  - Created with HTML and JS using the AmazeUI framework and API calls to the backend server
- Tested, reported, and fixed bugs in the primary Coursera-like application on WeChat

## PERSONAL PROJECTS

### **edw013.github.io**

- Used React, Bootstrap, and GitHub Pages to create and host a single-page application frontend
- Used Node.js, MongoDB, and Heroku for the backend server and database

### **A multiplayer battle royale-style game**

- Used TypeScript and Node.js for both client and server
- Utilized Socket.IO for real-time client-server communication

## SKILLS

Java, Python, JavaScript, TypeScript, C, C++, MySQL, HTML, Bash, Git, Linux, AWS, Microsoft Office

## EDUCATION

### **UC San Diego, San Diego** — *B.S. Computer Science, anticipated December 2019*

September 2015 - Present

## AWARDS

Top 8 in Beginner's Programming Competition, WIC at UCSD, Winter 2016
